## 16 Parasites of Public Health Importance in Veterinary Parasitology, 277

### Protozoans of Public Health

#### Importance, 279

#### Toxoplasma gondii

(*Toxoplasmosis*), 279

Human Infection With

Toxoplasmosis, 279

Symptoms and Diagnosis, 279

Treatment, 280

Prevention of Transmission to

Humans, 280

#### Cryptosporidium parvum

(*Cryptosporidiosis*), 280

Human Infection With

Cryptosporidiosis, 280

Symptoms and Diagnosis, 280

Treatment, 281

Prevention of Transmission to

Humans, 281

### Trematodes of Public Health

#### Importance, 281

#### Schistosomes of Wild Migratory Birds

(*Schistosome Cercarial Dermatitis, Swimmer's Itch*), 281

Human Infection With Swimmer's Itch, 282

Symptoms and Diagnosis, 282

Treatment, 282

Prevention of Transmission to

Humans, 282

### Cestodes of Public Health

#### Importance, 282

#### Taenia saginata (Beef

Tapeworm), 282

Human Infection With Beef

Tapeworm, 283

Symptoms and Diagnosis, 283

Treatment, 283

Prevention of Transmission to

Humans, 283

#### Taenia solium (Pork Tapeworm), 283

Human Infection With Pork

Tapeworm, 283

Symptoms and Diagnosis, 284

Treatment, 284

Prevention of Transmission to Humans, 284

#### Echinococcus granulosus

and Echinococcus

multilocularis (*Unilocular*

and *Multilocular Hydatid*

*Disease*), 285

Human Infection With Hydatid

Disease, 285

Symptoms and Diagnosis, 285

Treatment, 285

Prevention of Transmission to

Humans, 286

#### Dipylidium caninum (Human

*Dipylidiasis*), 286

Human Infection With

*Dipylidium*, 286

Symptoms and Diagnosis, 286

Treatment, 286

Prevention of Transmission to

Humans, 286

#### Spirometra mansonioides (Benign

*Plerocercoidosis/Malignant*

*Sparganosis*), 286

Human Infection With *Spirometra*

Species, 286

Symptoms and Diagnosis, 287

Treatment, 287

Prevention of Transmission to

Humans, 287

#### Hymenolepis nana

(*Hymenolepiasis*), 287

Human Infection With

*Hymenolepis*, 287

Symptoms and Diagnosis, 287

Treatment, 288

Prevention of Transmission to

Humans, 288

#### Diphyllobothrium latum

(*Diphyllobothriasis*), 288

Human Infection With

*Diphyllobothrium*, 288

Symptoms and Diagnosis, 288

Treatment, 288

Prevention of Transmission to

Humans, 289

## Nematodes of Public Health

### Importance, 289

**Toxocara canis and Toxocara cati**  
(*Toxocaral Larva Migrans, Visceral Larva Migrans, Ocular Larva Migrans*), 289

Human Infection With Toxocaral Larva Migrans, 289

Symptoms and Diagnosis, 289

Treatment, 290

Prevention of Transmission to Humans, 290

**Baylisascaris procyonis (Neural Larva Migrans, Cerebrospinal Nematodiasis)**, 290

Human Infection With Larvae of *Baylisascaris procyonis*, 290

Symptoms and Diagnosis, 290

Treatment, 291

Prevention of Transmission to Humans, 291

**Ancylostoma caninum, Ancylostoma braziliense, Ancylostoma tubaeforme, and Uncinaria stenocephala (Cutaneous Larva Migrans, Creeping Eruption, Plumber's Itch)**, 291

Human Infection With Cutaneous Larva Migrans, 292

Symptoms and Diagnosis, 292

Treatment, 293

Prevention of Transmission to Humans, 293

**Ancylostoma caninum (Enteric Hookworm Disease)**, 293

Human Infection With Enteric Hookworm Disease, 294

Symptoms and Diagnosis, 294

Treatment, 294

Prevention of Transmission to Humans, 294

**Strongyloides stercoralis (Strongyloidiasis)**, 295

Human Infection With *Strongyloides stercoralis*, 295

Symptoms and Diagnosis, 295

Treatment, 295

Prevention of Transmission to Humans, 295

**Trichostrongylus axei (Trichostrongyliasis)**, 295

Human Infection With

*Trichostrongylus axei*, 295

Symptoms and Diagnosis, 296

Treatment, 296

Prevention of Transmission to Humans, 296

**Trichinella spiralis (Trichinosis or Trichinellois)**, 296

Human Infection With Trichinosis, 296

Symptoms and Diagnosis, 296

Treatment, 297

Prevention of Transmission to Humans, 297

**Dirofilaria immitis (Pulmonary Dirofilariasis)**, 297

Human Infection With

*Dirofilariasis*, 297

Symptoms and Diagnosis, 298

Treatment, 298

Prevention of Transmission to Humans, 298

## Arthropods of Public Health

### Importance, 299

**Sarcoptes scabiei Variety canis (Canine Scabies)**, 299

Human Infection With Canine Scabies, 299

Symptoms and Diagnosis, 299

Treatment, 299

Prevention of Transmission to Humans, 299

## Pentastomes of Public Health

### Importance, 300

**Reptilian Pentastomiasis**, 300

Human Infection With Reptilian Pentastomes, 300

Symptoms and Diagnosis, 300

Treatment, 300

Prevention of Transmission to Humans, 300

## Conclusion, 301

## 17 Common Laboratory Procedures for Diagnosing Parasitism, 303

- Diagnosis of Parasites of the Digestive Tract, 304
  - Collection of the Fecal Sample, 304*
    - Small Animal Samples, 305
    - Large Animal Samples, 305
  - Examination of the Fecal Sample, 306*
    - Gross Examination of Feces, 306
    - Microscopic Examination of Feces, 309
    - Direct Smear, 311
  - Concentration Methods for Fecal Examination, 311*
    - Fecal Flotation, 312
    - Fecal Sedimentation, 316
  - Quantitative Fecal Examination, 316*
  - Examination of Feces for Protozoans, 317*
  - Fecal Culture, 318*
    - Nematode (Roundworm) Eggs, 318
    - Coccidial Oocysts, 318
  - Sample Collection at Necropsy, 319*
  - Shipping Parasitologic Specimens, 321*
  - Miscellaneous Procedures for Detection of Digestive Tract Parasites, 321*
    - Cellophane Tape Preparation, 321
    - Baermann Technique, 322
  - Blood in the Feces, 323*
  - Gross Examination of Vomitus, 323*
  - Microscopic Examination of Vomitus, 323*
- Diagnosis of Parasites of the Blood and Blood Vascular System, 323
  - Collection of Blood Samples, 324*
  - Examination of Blood, 324*
    - Direct Microscopic Examination, 324
    - Thin Blood Smear, 325
    - Thick Blood Smear, 325
    - Buffy Coat Method, 326
    - Modified Knott Technique, 326
    - Immunologic Heartworm Tests, 329
  - Miscellaneous Methods for Microfilarial Identification, 329

- Diagnosis of Parasitism of the Respiratory System, 330
  - Fecal Examination for Respiratory Parasites, 330*
  - Examination of Sputum and Tracheal Washes, 330*
- Diagnosis of Parasitism of the Urinary System, 330
  - Collection of the Urine Sample, 330*
  - Urine Examination for Parasites, 331*
- Diagnosis of Parasitism of the Skin, 331
  - Skin Scrapings, 331*
  - Cellophane Tape Preparation, 332*
  - Gross Specimens, 332*
- Diagnosis of Parasitism of Miscellaneous Body Systems, 332
  - Parasites of the Eye, 332*
  - Parasites of the Ear, 333*
  - Parasites of the Genital Tract, 333*

## 18 Reference to Common Parasite Ova and Forms Seen in Veterinary Medicine, 336

- Common Parasites of Dogs and Cats, 336
- Common Parasites of Horses, 341
- Common Parasites of Ruminants, 343
- Common Parasites of Swine, 345
- Common Parasites of Exotic Pets and Birds, 346
- Pseudoparasites, 353

## Appendix: Parasite Reference List by Species and Parasite Type, 355

- Parasites of Dogs and Cats, 355
  - Nematodes, 355*
  - Cestodes, 355*
  - Trematodes, 355*
  - Acanthocephalans, 355*
  - Protozoans, 355*
  - Arthropods, 356*
  - Pentastomes, 356*
  - Annelids, 356*
- Parasites of Ruminants, 356
  - Nematodes, 356*
  - Cestodes, 356*
  - Trematodes, 356*
  - Protozoans, 356*
